

## Start-up Accelerator for e-Solutions in Health in the Baltic Region

6-weeks Distance Learning + 2-weeks Cruise Hackathon Formula on the cruise ship

### WHAT?

EIT Health E-Boat is an accelerator for start-ups with innovative mobile health solutions. It is a unique program consisting of 6-weeks distance learning and 2-weeks of Cruise Hackathon Formula in the Baltic region to validate, develop and launch products in the European market. E-Boat drives the change and transform the health services with m-solutions.

### WHO?

Start-ups ready to **validate** the mobile friendly product/service and business concept in English language version. The teams should consist of 2 people / at least 1 IT specialist.

### HOW?

The programme is divided in 2 phases:

- **The first phase** offers 6-weeks of Distance Learning Module with on-line trainings concerning on the Principles of Universal Design, Lean methodology and customer development tools.
- **The second phase - Cruise Hackathon Formula** includes 2-weeks intensive and unique business creation sea-trip to validate and pitch the ideas in 5 Baltic Sea destinations: Gdansk, Klaipeda, Riga, Stockholm and Tallinn.

During the cruise **the start-ups** will learn, develop their products, identify customers, meet potential clients, local investors - under the supervision of IT specialists and the Universal Design mentors.
